PROFILE

Self-taught Front-End Developer with 4 years of experience building and designing responsive web applications. Proficient in HTML, CSS, JavaScript, and React.js as the main library, with experience using MUI, Bootstrap, and GitHub for modern UI development. Skilled in WordPress with Elementor, having successfully developed and deployed two business websites for a butcher shop and a taqueria, as well as a custom React.js website for Pedicure Clínico de Susy Sánchez.
Passionate about creating efficient, user-friendly, and visually appealing web experiences, continuously learning and improving development workflows. Open to collaborating on innovative projects and expanding technical expertise.

English (B1 level): Intermediate proficiency in English, enabling effective communication with international teams and clients.

EXPERIENCE

Patas-Pirque Adopción de Mascotas – Foo Talent Group

- Pet Adoption Platform (React.js Admin Panel Project)
- Contributed to the development of the admin panel for a pet adoption platform, building interfaces for managing pets, users, and adoption requests.
- Utilized technologies such as React.js, Tailwind CSS, React Hook Form, React Router Dom, and REST API integration to connect the frontend with the backend seamlessly.
- Ensured a responsive, user-friendly, and accessible experience, following the design specifications provided in Figma.
- The panel was successfully delivered with honorable mention, achieving second place out of 6 teams, and received positive feedback from both the foundation and the evaluation team.
  GitHub repository (team project): [https://github.com/Carolina2024/match_project]

Christian M. Carnicero Profesional

- Developed a personal portfolio website to showcase my skills and experience as a professional butcher.
- Built using React.js, MUI, CSS, incorporating AOS.js for smooth scroll animations and enhanced user experience.
- Designed to facilitate job opportunities abroad, providing a visually appealing and informative presentation of my expertise.

E-commerce Toy

- Developed a fully functional toy store e-commerce platform using React.js, Bootstrap, and Firebase as part of my final project at Coderhouse.
- Implemented a dynamic shopping cart with real-time database integration, enabling users to add, remove, and purchase products seamlessly.
- Utilized Firebase for user authentication and product management, ensuring a smooth and secure shopping experience.
- Successfully completed the project with a passing final grade, demonstrating proficiency in React.js development and e-commerce solutions.
